

AVerMedia POS Capture Box

Front View

Back View

With the AVerDiGi POS Capture Box, you can integrate your Point of Sale (POS) equipment with the AVerMedia AVerDiGi NV series or any surveillance system that supports POS feature. It transmits the transaction data to both the POS printer and the surveillance system. This way the transaction data can be overlaid onto the surveillance video as well as kept in the event log. With this information, you can then monitor, record and keep track of items that were sold from the POS.
(AVerMedia SKU# NVDPOSB0X)

Major Features

<ul style="list-style-type: none"> Connects to most devices that outputs serial RS-232 communication protocol. This includes ATM/POS/RF devices 	<ul style="list-style-type: none"> Captured data is searchable in conjunction with the NV software
